

Installation training for users (gravity and pressure applications)

Through the multiCampus, SAERTEX multiCom® offers you a comprehensive training programme in which our experienced experts pass on their knowledge to you. Our training and further education opportunities aim to teach you about the products and technologies of trenchless pipeline rehabilitation through practical content.

In our installation training, users receive the essential knowledge about our SAERTEX-LINER®. Here you can choose between gravity and pressure applications.

Training contents in detail

Theoretical contents

- SAERTEX-LINER: Product portfolio and areas of application
- Structure of the SAERTEX-LINER: resin types, support materials/reinforcements and foils
- Plant technology
- Planning and site preparation
- Installation process: preparatory measures, curing and necessary ancillary work
- Quality assurance: leak test, optical inspection and sampling

Practical contents

- Essential knowledge of UV curing using SAERTEX-LINER
- Safety regulations
- UV system technology and installation equipment
- Installation SAERTEX-LINER: preparation, curing under consideration of the installation parameters
- Quality assurance measures

For your planning

Venue

Our comprehensive theoretical and practical training content is taught on our premises and on the in-house training grounds of SAERTEX multiCom GmbH. If you are interested, we would be happy to offer you a tour of the factory and laboratory.

In-house training at your site is also possible.

Seminar duration

2 days (gravity or pressure application)

3 days (gravity and pressure application)

Seminar dates

Arrange your training dates personally and individually with us.

We look forward to hearing from you.
